Style

La struttura resistente del prodotto, gli spessori elevati e il design ricercato sono gli elementi innovativi che caratterizzano la gamma, dando vita ad una tipologia di stoviglie completamente nuove che, unitamente all'ampia disponibilità di forme e colori, permette creazioni uniche e distintive in estrema praticità e a costi contenuti. Per questo motivo possiamo affermare come la gamma GOLDFLAST sia una vera e propria rivoluzione nel mondo delle stoviglie.

Usa&RiUsa e Ricicla

Le collezioni GOLDFLAST sono progettate per resistere a diversi cicli di utilizzo, producendo una sensibile riduzione dell'impatto ambientale e una maggiore convenienza economica per il consumatore finale. Per ottenere questo risultato, l'Azienda ha rivisto le modalità di progettazione del prodotto per renderlo più resistente ai ripetuti lavaggi, in conformità alla normativa europea EN 12875:2005 e sicuro al contatto alimentare, coerentemente con le direttive MOCA relative ai prodotti pluriuso.

Riduzione impatto ambientale

GOLDFLAST vuole essere sinonimo di stile nel massimo rispetto per l'ambiente. È a questo principio che si ispirano la progettazione del prodotto e l'intera gestione dei cicli produttivi. Come strumento di misura delle proprie performance in campo ambientale, l'Azienda ha adottato da anni il sistema di gestione ISO 14001 e gli standard internazionali di LCA (Life Cycle Assessment), utilizzati per misurare l'impatto ambientale del prodotto. Sono proprio i test di LCA che dimostrano una sensibile riduzione dell'impatto ambientale del prodotto anche a confronto con gli articoli analoghi di natura compostabile.

Use&ReUse and Recycle

GOLDFLAST collections are made to resisting to many washing cycles, products are reusable and contribute to reduce significantly the environmental impact, and the resulting saving for the consumer is a major plus. The company changed the design model in order to obtain products more resistant to washing cycles, in respect of the European legislation EN 12875:2005 and the FCM directive concerning reusable products.

Low environmental impact

GOLDFLAST wants to represent a style concept in respect of the environment: design and all production stages of are guided by this principle. For years, the Company has adopted the ISO 14001 Management System and the international standards certified by the LCA (Life Cycle Assessment) to ensure the monitoring of the environmental impact of products. LCA tests show a significant reduction of the environmental impact of our products, even in comparison with similar and compostable ones.

The whole range of products is characterised by strong structure, high thickness and sophisticated design: all these innovative elements make GOLDFLAST tableware unique and distinctive, preserving its wide color range and shapes at competitive costs. For this reason, GOLDFLAST collection is a real revolution in the world of party table accessories.

"Utilise Réutiliser" et Recycler

Les collections GOLDFLAST sont conçues pour résister à différents cycles d'utilisation, entraînant une réduction significative de l'impact environnemental et une meilleure rentabilité pour le consommateur final. Pour obtenir ce résultat, la Société a révisé la manière de la conception du produit pour le rendre plus résistant aux lavages répétés, conformément à la norme européenne EN 12875: 2005, et sans danger pour le contact alimentaire conformément aux directives MOCA relatives aux produits polyvalents.

Réduction de l'impact environnemental

GOLDFLAST veut être synonyme de style avec le plus grand respect de l'environnement. Ce principe s'appuie sur la conception du produit et de l'ensemble de la gestion des cycles de production. En tant qu'outil de mesure de la performance environnementale, la société a adopté le système de gestion ISO 14001 et les normes internationales d'ACV (Analyse du Cycle de Vie), ces dernières permettant de mesurer l'impact du produit sur l'environnement. Ce sont précisément les tests d'ACV qui démontrent une réduction significative de l'impact du produit sur l'environnement, également par comparaison avec des produits similaires de nature compostable.

Stil

Die widerstandsfähige Struktur des Produkts, die hohen Dicken und das raffinierte Design sind die innovativen Elemente, die das Sortiment auszeichnen. Dadurch wird ein völlig neuer Typ von Gericht zum Leben erweckt, der zusammen mit der großen Vielfalt an Formen und Farben einzigartige und unverwechselbare Kreationen im Extrembereich ermöglicht Praktikabilität und Kosten.

Wiederverwendbarkeit

Die GOLDFLAST-Kollektionen sind für unterschiedliche Nutzungszyklen ausgelegt, was zu einer erheblichen Verringerung der Umweltauswirkungen und einer höheren Kosteneffizienz für den Endverbraucher führt. Um dieses Ergebnis zu erreichen, hat das Unternehmen die Art und Weise des Produkts überarbeitet, dass es widerstandsfähiger gegen wiederholtes Waschen ist, gemäß der europäischen Norm EN 12875: 2005, und sicher für den Lebensmittelkontakt ist, der den MOCA-Richtlinien für Mehrzweckprodukte entspricht.

Reduzierung der Umweltbelastung

GOLDFLAST möchte mit Stil und Respekt für die Umwelt gleichbedeutend sein. Dieses Prinzip basiert auf dem Produktdesign und der gesamten Steuerung der Produktionszyklen. Als ein Instrument zur Messung der Umweltleistung hat das Unternehmen das Managementsystem ISO 14001 und die internationalen Standards der Ökobilanzierung (Life Cycle Assessment) eingeführt, wobei letztere die Umweltauswirkungen des Produkts messen soll. Genau die Ökobilanztests zeigen eine signifikante Verringerung der Umweltauswirkungen des Produkts, auch im Vergleich zu ähnlichen Produkten, die kompostierbar sind..

DECORO LASER LASER DECORATION

Il decoro laser si affianca alla stampa tampografica per la personalizzazione di superfici destinate al contatto con gli alimenti che non permettono l'utilizzo di inchiostri. Estremamente versatile, il marcitore laser penetra e riscalda la superficie della stoviglia lasciando un'incisione monocromatica precisa e nitida che dura nel tempo e resiste ad infiniti cicli di lavaggio anche in campo professionale. Grazie a questa nuova tecnologia, svilupperemo insieme a voi la soluzione più adatta per dare il giusto valore al vostro brand.

Laser decoration has been added to the traditional pad printing on surfaces that need to be food contact safe and cannot allow the use of inks. Extremely versatile, the laser marker leaves a monochrome and clear engraving that lasts long and is resistant to unlimited washing cycles, even with professional dishwasher machines. Thanks to this new technology, we'll develop together the most suitable solution to enhance your brand.

La décoration laser est utilisée en parallèle à la tampographie pour personnaliser les surfaces en contact avec les aliments, qui ne permettent pas l'utilisation d'encre. Extrêmement polyvalent, le marqueur laser pénètre et chauffe la surface de la vaisselle, laissant une gravure monochrome précise et nette qui dure dans le temps et résiste à d'interminables cycles de lavage, même dans le domaine professionnel. Grâce à cette nouvelle technologie, nous développerons avec vous la solution la plus adaptée pour donner la juste valeur à votre marque.

Die Laserdekorierung ergänzt den Tampondruck zur Personalisierung von Oberflächen, die für den Kontakt mit Lebensmitteln geeignet sind und die Verwendung von Farben nicht zulassen. Der äußerst vielseitige Lasermarker durchdringt und erwärmt die Oberfläche des Geschirrs und hinterlässt eine präzise und scharfe monochromatische Gravur, die lange hält und auch im professionellen Bereich endlosen Waschzyklen widersteht. Dank dieser neuen Technologie entwickeln wir gemeinsam mit Ihnen die am besten geeignete Lösung, um Ihrer Marke den richtigen Wert zu verleihen.

 La gamma Mineral nasce dall'unione tra un polimero altamente performante quale il Polipropilene e il Talco Micronizzato di grado alimentare, un minerale che permette di ridurre il consumo di materie prime da fonti fossili e, al tempo stesso, aumentare la durezza e la resistenza del manufatto. Composta da diverse forme e colori, si fa apprezzare particolarmente in contesti che richiedono sicurezza assoluta al contatto alimentare, infrangibilità ed estrema praticità d'uso, pur mantenendo un posizionamento di prezzo tra i più bassi della categoria. Picnic, barbecue, ristorazione commerciale e collettiva o ristorazione sui mezzi di trasporto, la gamma Mineral si fa valere ovunque servano praticità e sicurezza, specialmente dove c'è un bambino.

 *The Mineral range is born from the union between a high performance polymer such as polypropylene and food grade micronized talc, a mineral that allows to reduce the consumption of raw materials from fossil sources and, at the same time, increases the toughness and resistance of the product. Composed of different shapes and colors, these products can be appreciated especially for their absolute safety to food contact, unbreakability and extreme practicality of use, while maintaining a price positioning among the lowest in the category. Picnics, barbecues, commercial and collective catering or food truck catering, the Mineral range is the perfect fit wherever practicality and safety are needed, especially where there is a child.*

 La gamme Minéral est née de l'union entre un polymère hautement performant tel que le Polypropylène et le Talc Micronisé de degré alimentaire, un minéral qui permet de réduire la consommation de matières premières à partir de sources fossiles et, en même temps, augmenter la dureté et la résistance de l'article. Composée de différentes formes et couleurs, elle se fait particulièrement apprécier dans des contextes qui exigent sécurité absolue au contact alimentaire, incassabilité et extrême praticité d'utilisation, tout en maintenant un positionnement de prix parmi les plus bas de la catégorie. Pique-nique, barbecue, restauration commerciale et collective ou restauration sur les moyens de transport, la gamme Mineral s'affirme partout où la praticité et la sécurité sont nécessaires, surtout lorsqu'il y a un enfant.

 Die Mineral-Serie ist aus der Kombination eines Hochleistungspolymers wie Polypropylen und Micronized Talk entstanden, ein Mineral, das den Verbrauch von Rohstoffen aus fossilen Quellen reduziert und gleichzeitig die Härte und Beständigkeit des Polymers erhöht.

Die Linie besteht aus verschiedenen Formen und Farben, schätzt man es besonders in Kontexten, die absolute Sicherheit im Kontakt mit Lebensmitteln, Unzerbrechlichkeit und extreme Anwendbarkeit erfordern, während eine Preispositionierung unter den niedrigsten in der Kategorie beibehalten wird. Ob Picknicks, Grillen, gewerbliche und kollektive Verpflegung oder Verpflegung auf Transportmitteln, gilt die Mineral-Serie überall dort, wo Zweckmäßigkeit und Sicherheit gefragt sind, insbesondere dort, wo ein Kind lebt.
